CHILD X-RAY RELEASE FORM

A complimentary radiograph may be taken at your child's initial consultation visit. If you decide to begin orthodontic treatment, complete diagnostic studies (i.e. x-rays, photographs and study models) will be needed. If an appointment is made to obtain these studies, and they are taken but treatment is not started, there will be a charge of \$635 to cover the cost of the diagnostic studies and work-up of records. Diagnostic studies involving jaw surgery will be billed at an additional cost.

I hereby agree to allow Long Orthodontic Associates to photograph and x-ray my son/daughter's face and jaws and prepare models for diagnostic and follow-up purposes. It is understood that all portions of the study materials will be examined and analyzed in order to provide the best possible treatment and that all or portions of the material may be used for presentation as educational information. In so doing, Long Orthodontic Associates agrees to take appropriate measures to insure the privacy of the undersigned.
